Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found under http://webapp.etsi.org/key/queryform.asp.

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the <u>ETSI Drafting Rules</u> (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

Introduction

The present document is part of a TS-family covering the 3rd Generation Partnership Project; Technical Specification Group Services and System Aspects; Telecommunication management; as identified below:

- 32.441 "Trace Management Integration Reference Point (IRP): Requirements".
- 32.442 "Trace Management Integration Reference Point (IRP): Information Service (IS)".
- 32.443 "Trace Management Integration Reference Point (IRP): Common Object Request Broker Architecture (CORBA) Solution Set (SS)".
- 32.445 "Trace Management Integration Reference Point (IRP): eXtensible Markup Language (XML) file format definition".

The present document is part of a TS-family which describes the information service necessary for the Telecommunication Management (TM) of 3G systems. The TM principles and TM architecture are specified in 3GPP TS 32.101 [1] and 3GPP TS 32.102 [2].

Trace provides very detailed information on call level for a specific subscriber or MS. This data is an additional information source to Performance Measurements and allows deeper investigations in problems solving or in case of optimization.

1 Scope

The present document describes the mechanism used for control and configuration of the Trace, Minimization of Drive Test (MDT) and Radio Link Failure (RLF) reporting functionality through Itf-N. This specification is applicable to UMTS networks and EPS networks. GSM Trace is outside of the scope of this specification.

The conditions for supporting Network Sharing are stated in 3GPP TS 32.441 [13].

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.
- 3GPP TS 32.101: "Telecommunication management; Principles and high level requirements". [1] [2] 3GPP TS 32.102: "Telecommunication management; Architecture". [3] 3GPP TS 32.150: "Telecommunication management; Integration Reference Point (IRP) Concept and definitions". Void. [4] [5] 3GPP TS 32.622: "Telecommunication management; Configuration Management (CM); Generic network resources Integration Reference Point (IRP); Network Resource Model (NRM)". [6] 3GPP TS 32.302: "Telecommunication management; Configuration Management (CM); Notification Integration Reference Point (IRP): Information Service (IS)". [7] 3GPP TS 32.342: "Telecommunication management; File Transfer (FT) Integration Reference Point (IRP): Information Service (IS)". 3GPP TS 32.312: "Telecommunication management; Generic Integration Reference Point (IRP) [8] management: Information Service (IS)". [9] 3GPP TS 32.422: "Telecommunication management; Subscriber and equipment trace; Trace control and configuration management". [10] 3GPP TS 32.602: "Telecommunication management; Configuration Management (CM); Basic CM Integration Reference Point (IRP): Information Service (IS)". 3GPP TS 25.331: "Radio Resource Control (RRC); Protocol specification" [11]3GPP TS 36.331: "Evolved Universal Terrestrial Radio Access (E-UTRA); Radio Resource [12] Control (RRC); Protocol specification". [13] 3GPP TS 32.441: "Trace Management Integration Reference Point (IRP): Requirements". 3GPP TS 36.300: "Evolved Universal Terrestrial Radio Access (E-UTRA) and Evolved Universal **[14]** Terrestrial Radio Access Network (E-UTRAN); Overall description; Stage 2".

3 Definitions and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in 3GPP TS 32.101 [1], 3GPP TS 32.102 [2], 3GPP TS 32.150 [3] and the following apply:

IRPAgent: See 3GPP TS 32.102 [2].

IRPManager: See 3GPP TS 32.102 [2].MBSFN Area: See 3GPP TS 36.300 [14]

MBSFN Area Reserved Cell: See 3GPP TS 36.300 [14]

3.2 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TS 32.101 [1], 3GPP TS 32.102 [2], 3GPP TS 32.150 [3] and the following apply:

IOC Information Object Class
IRP Integration Reference Point
IS Information Service

MBMS Multimedia Broadcast Multicast Services
MBSFN MBMS over a Single Frequency Network

MDT Minimization of Drive Tests
OMG Object Management Group

RCEF RRC Connection Establisment Failure

RLF Radio Link Failure

UML Unified Modelling Language (OMG)

4 System Overview

4.1 System context

The general definition of the System Context for the present IRP is found in 3GPP TS 32.150 [3] subclause 4.7.

In addition, the set of related IRP(s) relevant to the present IRP is shown in the two diagrams below.

Figure 4.1.1: System Context A

Figure 4.1.2: System Context B

4.2 Compliance rules

For general definitions of compliance rules related to qualifiers (Mandatory/Optional/Conditional) for *operations*, *notifications and parameters* (of operations and notifications) please refer to 3GPP TS 32.150 [3].

5 Information Object Classes

5.1 Imported information entities and local labels

Label reference	Local label
3GPP TS 32.622 [5], information object class, Top	Top
3GPP TS 32.622 [5], information object class, IRPAgent	IRPAgent
3GPP TS 32.622 [5], information object class, GenericIRP	GenericIRP
3GPP TS 32.302 [6], information object class, NotificationIRP	NotificationIRP
3GPP TS 32.342 [7], information object class, FileTransferIRP	FileTransferIRP
3GPP TS 32.602 [10], information object class, ManagedEntity	ManagedEntity

5.2 Class diagram

5.2.1 Attributes and relationships

This clause introduces the set of Information Object Classes (IOCs) that encapsulate information within the IRPAgent. The intent is to identify the information required for the TraceIRP implementation of its operations and notification emission. This clause provides the overview of all support object classes in UML. Subsequent clauses provide more detailed specification of various aspects of these support object classes.

Figure 5.2.1: Information Object Class (IOC) UML diagram

5.2.2 Inheritance

Figure 5.2.2: Information Object Class Inheritance UML Diagram

5.3 Information object class definitions

5.3.1 TraceJob

5.3.1.1 Definition

It represents a task that controls the Trace Sessions and collects the trace data (i.e. collects the TraceRecord of multiple ManagedEntity instances). The TraceReference is a unique ID, which identifies the Trace Session that has been created by the TraceJob and activated to one or multiple ManagedEntity instance(s).

It represents also the task that controls the UE based network performance measurements.

When a TraceJob is created the following attributes cannot be modified via the Itf-N:

- TraceReference
- ListOfInterfaces
- ListofNeTypes
- TraceDepth
- TraceTarget
- TriggeringEvent
- JobType
- areaScope
- ListOfMeasurements
- ReportingTrigger
- ReportInterval
- ReportAmount
- EventThreshold
- LoggingInterval
- LoggingDuration
- IPAddressOfTCE
- AnonymizationofMDTData
- MeasurementPeriodLTE
- MeasurementPeriodUMTS
- CollectionPeriodRrmUmts
- CollectionPeriodRrmLte
- PositioningMethod
- MeasurementQuantity
- PLMNTarget
- MBSFNAreaList

If for any reason the TraceIRP determines that a Trace Session has been activated in its ManagedEntity(ies) the TraceIRP shall emit the "noitfyTraceSessionLocalActivation" notification to the subscribed IRPManagers to inform the active Trace Sessions. The IRPManagers can decide whether they deactivate the Trace Session or keep the Trace Session active. (E.g. if the TraceReference is colliding with an existing TraceJob's TraceReference, the IRPManager may decide to immediately deactivate the Trace Session in that ManagedEntity.)

The TraceJob shall use its information to activate and configure Trace Session(s) in the requested ManagedEntity instance(s). When the TraceIRP determines that there are available TraceRecord files, it shall emit a notification to all subscribed IRPManagers informing the availability of the files. The method and the notification of the available files is described in the File Transfer IRP (3GPP TS 32.342 [7]).

If a TraceJob receives an indication from one of its ManagedEntity that starting a Trace Recording Session is failed for any reason, the "notifyTraceRecordingSessionFailure" notification may be emitted to inform all subscribed IRPManagers that there was a Trace Recording Session that was not started in the ManagedEntity.

5.3.1.2 Attributes

Attribute name	Support Qualifier
traceReference	М
listOfInterfaces	0
listOfNeTypes	CM
traceDepth	CM
traceTarget	М
triggeringEvent	CM
traceCollectionEntityAddress	М
jobType	М
listOfMeasurements	CM
reportingTrigger	CM
reportInterval	CM
reportAmount	CM
eventThreshold	CM
loggingInterval	CM
loggingDuration	CM
areaScope	CM
anonymizationOfMDTData	CM
measurementPeriodLTE	CM
measurementPeriodUMTS	CM
collectionPeriodRrmUmts	CM
collectionPeriodRrmLte	CM
positioningMethod	CM
measurementQuantity	CM
pLMNTarget	CM
mBSFNAreaList	CM

5.3.1.3 Attribute constraints

The listOfNeTypes attributes shall be present only for Signalling Based Activation.

The traceTarget shall be public ID in case of a Management Based Activation is done to an ScscfFunction. The TraceTarget shall be cell only in case of the UTRAN cell traffic trace function.

The TraceTarget shall be E-UtranCell only in case of E-UTRAN cell traffic trace function. The traceTarget shall be either IMSI or IMEI(SV) if the Trace Session is activated to any of the following ManagedEntity(ies):

- HssFunction
- MscServerFunction
- SgsnFunction
- GgsnFunction
- BmscFunction
- RncFunction
- MmeFunction

The traceTarget shall be IMSI if the Trace Session is activated to a ManagedEntity playing a role of ServinGWFunction.

In case of subscription based MDT, the traceTarget attribute shall be able to carry (IMSI or IMEI(SV)), the areaScope attribute shall be able to carry a list of (cell or EUtranCell or TA/LA/RA).

In case of area based Immediate MDT, the traceTarget attribute shall be null value, the areaScope attribute shall carry a list of (Utrancell or E-UtranCell).

In case of area based Logged MDT, the traceTarget attribute shall carry an eNodeBs or a RNC. The Logged MDT should be initiated on the specified eNodeB/RNC in TraceTarget. The areaScope attribute shall carry a list of (Utrancell or E-UtranCell or TA/LA/RA)..

In case of RLF reporting, or RCEF reporting, the traceTarget attribute shall be null value, the areaScope attribute shall carry one or list of eNBs.

- traceTarget: This attribute shall be present if Trace or MDT RLF or RCEF reporting is supported.
- areaScope: This attribute shall be present if MDT is supported.
- triggeringEvent: This attribute shall be present only if Trace is supported.
- listOfMeasurements: This attribute shall be present only if MDT is supported and the JobType attribute is set to ImmediateMDT.
- reportingTrigger: This attribute shall be present only if MDT is supported and the JobType attribute is set to ImmediateMDT and the ListOfMeasurements attribute is configured for M1 (for both UMTS and LTE) or M2 (only for UMTS).
- reportInterval: This attribute shall be present only if MDT is supported and the JobType attribute is set to ImmediateMDT and the ReportingTrigger is configured for PeriodicMeasurements
- reportAmount: This attribute shall be present only if MDT is supported and the JobType attribute is set to ImmediateMDT and the ReportingTrigger attribute is configured for PeriodicMeasurements.
- eventThreshold: This attribute shall be present only if MDT is supported and the JobType attribute is set to ImmediateMDT and the ReportTrigger attribute is configured for A2EventReporting in LTE or 1F/1IEventReporting in UMTS.
- loggingInterval: This attribute shall be present only if MDT is supported and the JobType attribute is set to LoggedMDT or Logged MBSFN MDT.
- loggingDuration: This attribute shall be present only if MDT is supported and the JobType attribute is set to LoggedMDT or Logged MBSFN MDT.
- anonymizationOfMDTData: This attribute shall be present only if MDT is supported and the mdtAreaScope attribute is present.
- measurementPeriodLTE: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combine Trace and Immediate MDT and the listOfMeasurements parameter for LTE has either M4 or M5 measurement set.
- measurementPeriodUMTS: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combine Trace and Immediate MDT and the listOfMeasurements parameter for UMTS has M6 or M7 measurements set.
- collectionPeriodRrmUmts: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combine Trace and Immediate MDT and the listOfMeasurements parameter has any of M3, M4, M5 measurement set in case of UMTS.
- collectionPeriodRrmLte: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combine Trace and Immediate MDT and the listOfMeasurements parameter has any of M2, M3 measurement set in case of LTE.
- positioningMethod: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combine Trace and Immediate MDT.
- measurementQuantity: This attribute shall be present only if MDT is supported and the JobType attribute is set to Immediate MDT or combined Trace and Immediate MDT and the reportingTrigger parameter is set to event 1F.

- pLMNTarget: This attribute shall be present for management based activation when several PLMNs are supported in the RAN.
- mBSFNAreaList: This attribute shall be present only if Logged MBSFN MDT is supported and the JobType attribute is set to Logged MBSFN MDT. This is applicable only for eUTRAN.

5.3.2 TraceRecord

5.3.2.1 Definition

TraceRecord is the representation of the files containing the logged information from the Trace Recording Sessions.

5.3.2.2 Attributes

Attribute name	Visibility	Support Qualifier	Read Qualifier	Write Qualifier
fileName	+	M	M	-

5.3.3 TraceIRP

5.3.3.1 Definition

TraceIRPis the representation of the trace management capabilities specified by the present document. This IOC inherits from ManagedGenericIRP IOC specified in 3GPP TS 32.312 [8].

5.3.4 ManagedEntity

5.3.4.1 Definition

In case of Signalling Based Activation the ManagedEntity represents the role that can be played by an instance of one of the following IOCs:

- HssFunction
- MscServerFunction
- SgsnFunction
- MmeFunction

In case of Management Based Activation the ManagedEntity represents the role that can be played by an instance of the following IOCs:

- HssFunction
- MscServerFunction
- SgsnFunction
- GgsnFunction
- BmscFunction
- RncFunction
- CscfFunction
- MmeFunction
- ServingGWFunction

In case of Cell Traffic Trace the ManagedEntity represents the role that can be played by an instance of the following IOCs:

- UtranCell
- E-UtranCell

5.4 Information relationship definitions

5.4.1 relation-traceIRP-traceJob (M)

5.4.1.1 Definition

This represents the relationship between TraceIRP and the TraceJob.

5.4.1.2 Roles

Name	Definition
theTraceIRP	It represents the TraceIRP
theTraceJobList	It represents the TraceJobList

5.4.2 relation-traceJob-managedEntity (M)

5.4.2.1 Definition

This represents the relationship between TraceJob and the ManagedEntity.

5.4.2.2 Roles

Name	Definition
theManagedEntity	The ManagedEntity, when playing this role, represents the actual network resource instance,
	where a Trace Session is activated.
theTraceJob	It represents the TraceJob

5.4.3 relation-traceJob-traceRecord (M)

5.4.3.1 Definition

This represents the relationship between TraceJob and the TraceRecord.

5.4.3.2 Roles

Name	Definition
theTraceJob	It represents the TraceJob
theTraceRecord	It represnts the TraceRecord.

- 5.5 Information attribute definitions
- 5.5.1 Definition and legal values

Attribute Name	Definition	Legal Values
anonymizationOfMDTData	It specifies the level of anonymization for an area based MDT.	See 3GPP TS 32.422 [9]
areaScope	For RLF and RCEF reporting it specifies the eNB or list of eNBs where the RLF or RCEF reports should	List of cells/TA/LA/RA for subscription based MDT or area based Logged MDT. List of cells for area based Immediate MDT.
		Cell, TA, LA, RA are mutually exclusive. One or list of eNBs for RLF and RCEFreporting
collectionPeriodRrmLte	configured measurement samples for M2, M3 in LTE. The attribute is applicable only for Immediate MDT. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
collectionPeriodRrmUmts	configured measurement samples for M3, M4, M5 in UMTS. The attribute is applicable only for Immediate MDT. In case this attribute is not used, it carries a null semantic.	
eventThreshold	It specifies the threshold which should trigger the reporting in case A2 event reporting in LTE or 1F/1I event in UMTS. The attribute is applicable only for Immediate MDT and when reportingTrigger is configured for A2 event in LTE or 1F event or 1I event in UMTS. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9] , 3GPP TS 25.331 [11] , 3GPP TS 36.331 [12]
jobType	It specifies the MDT mode and it specifies also whether the TraceJob represents only MDT, Logged MBSFN MDT, Trace or a combined Trace and MDT job. The attribute is applicable for Trace, MDT, RCEF and RLF reporting.	See 3GPP TS 32.422 [9]
listOfInterfaces	It specifies the interfaces that need to be traced in the given ManagedEntityFunction. The attribute is applicable only for Trace. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
listOfMeasurements	It specifies the UE measurements that shall be collected in an Immediate MDT job. The attribute is applicable only for Immediate MDT. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
listOfNETypes	It specifies in which type of ManagedFunction the trace should be activated. The attribute is applicable only for Trace with Signalling Based Trace activation. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
loggingDuration	at the UE in case of Logged MDT. The attribute is applicable only for Logged MDT and Logged MBSFN MDT. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
loggingInterval	It specifies the periodicty for Logged MDT. The attribute is applicable only for Logged MDT and Logged MBSFN MDT. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9], 3GPP TS 25.331 [11] , 3GPP TS 36.331 [12]
measurementPeriodLTE		See 3GPP TS 32.422 [9]

Attribute Name	Definition	Legal Values
measurementPeriodUMTS	It specifies the measurement period for the Data Volume and Throughput measurements for MDT taken by RNC. The attribute is applicable only for Immediate MDT. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
measurementQuantity		See 3GPP TS 32.422 [9]
pLMNTarget		See 3GPP TS 32.422 [9]
positionigMethod	It specifies what positioning method should be used in the MDT job.	
reportAmount	It specifies the number of measurement reports that shall be taken for periodic reporting while the UE is in connected. The attribute is applicable only for Immediate MDT and when reportingTrigger is configured for periodical measurements. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
reportInterval	It specifies the interval between the periodical measurements that shall be taken when the UE is in connected mode. The attribute is applicable only for Immediate MDT and when reportingTrigger is configured for periodical measurements. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]
reportingTrigger		See 3GPP TS 32.422 [9]
traceCollectionEntityAddress		See 3GPP TS 32.422 [9]
traceDepth		See 3GPP TS 32.422 [9]
traceReference		See 3GPP TS 32.422 [9]
traceTarget	It specifies the target object of the Trace and MDT. The attribute is applicable for both Trace and MDT. This attribute includes the ID type of the target and the ID value.	The ID type may be IMSI or IMEI or IMEISV or Public ID or Private ID or a Cell or an eNB or a RNC. The ID value can be a string. If the ID type is a Cell, the ID value can be identified by its DN id. IMSI, IMEI, IMEISV, Public ID, cell, eNB and RNC are mutually exclusive.
triggeringEvent	It specifies the triggering event parameter of the trace session. The attribute is applicable only for Trace. In case this attribute is not used, it carries a null semantic.	See 3GPP TS 32.422 [9]

Attribute Name	Definition	Legal Values
	The MBSFN Area consists of a MBSFN Area ID and Carrier Frequency (EARFCN). The target MBSFN area List can have up to 8 entries. This parameter is applicable only if the job type is Logged MBSFN MDT.	See 3GPP TS 32.422 [9]

6 Interface Definition

6.1 Class diagram representing interfaces

Figure 6.1: Class Diagram

6.2 Generic rules

- Rule 1: each operation with at least one input parameter supports a pre-condition valid_input_parameter which indicates that all input parameters shall be valid with regards to their information type. Additionally, each such operation supports an exception operation_failed_invalid_input_parameter which is raised when pre-condition valid_input_parameter is false. The exception has the same entry and exit state.
- **Rule 2:** each operation with at least one optional input parameter supports a set of pre-conditions supported_optional_input_parameter_xxx where "xxx" is the name of the optional input parameter and the pre-condition indicates that the operation supports the named optional input parameter. Additionally, each such operation supports an exception operation_failed_unsupported_optional_input_parameter_xxx which is raised when (a) the pre-condition supported_optional_input_parameter_xxx is false and (b) the named optional input parameter is carrying information. The exception has the same entry and exit state.
- **Rule 3:** each operation shall support a generic exception operation_failed_internal_problem which is raised when an internal problem occurs and that the operation cannot be completed. The exception has the same entry and exit state.

NOTE: These rules are mapped at the solution set level. Pre-conditions and exceptions, generated by these rules, need not appear explicitly in the present document.

6.3 TraceIRPManagement (M)

6.3.1 Operation activateTraceJob (M)

6.3.1.1 Definition

This operation support IRPManager's request to create a TraceJob through Itf-N.

Once the TraceJob has been created, the attributes of the TraceJob will not be modified during the lifetime of the TraceJob.

One TraceJob can manage Trace Sessions in one or more ManagedEntity.

6.3.1.2 Input parameters

Parameter Name	Qualifier	Information type	Comment
iOCInstance	М	ManagedEntity.objectInstance	It specifies the DN of ManagedEntity
			instance where Trace Session is to be activated.
listOfInterfaces	0	TraceJob.listOfInterfaces	401.741041
listOfNeTypes	СМ	TraceJob.listOfNeTypes	It specifies the type of ManagedFunctions.
traceDepth	М	TraceJob.traceDepth	It shows the
			traceDepth set to
_		_	the Trace Session.
traceReference	M	TraceJob.traceReference	It identifies the TraceSession.
traceTarget	М	TraceJob.traceTarget	IMSI or IMEI or
			IMEISV or Public ID
			or Private ID or a Cell(identified by its
			DN id) or an eNB or a
			RNC.
			IMSI, IMEI,
			IMEISV,Public ID,
			Cell, eNB and RNC
			are mutually
triggeringEvent	CO	TraceJob.triggeringEvent	exclusive.
traceCollectionEntityAddress		TraceJob.traceCollectionEntityAddress	It specifies the
	OW, CC		address to the Trace
			Collection Entity that
			is associated to the
			TraceJob. See
. 1		m 1 - 1 m	3GPP TS 32.422 [9].
jobType	М	TraceJob.jobType	It specifies the type of the TraceJob
areaScope	СМ	TraceJob.areaScope	It specifies MDT area (Cells/TA/RA/LA)
			where the Logged
			MDT measurements
			or Logged MBSFN
			MDT shall be collected.
			It specifies one or list
			of eNBs where the
			RLF or RCEF reports
			shall be collected.
			It specifies MDT area
			(list of cells) where the Immediate MDT
			measurements shall
			be collected.
listOfMeasurements	CM	TraceJob.listOfMeasurements	It specifies the
			measurements to be
reportingTrigger	CM	TraceJob.reportingTrigger	collected from the UE It specifies the
1 chor critain rader	CIVI	Tracenop.reportringiringger	reporting trigger
			(event based reporting or periodic
	014		reporting) in the UE.
reportInterval	CM	TraceJob.reportInterval	It specifies the interval between the
			periodical
			measurements to be
			taken by the UE.

Parameter Name	Qualifier	Information type	Comment
reportAmount	CM	TraceJob.reportAmount	It specifies the
			number of measurement reports
			to be taken in
			periodical reporting in
			the UE
eventThreshold	CM	TraceJob.eventThreshold	It specifies the threshold triggering
			the reporting in case
			of A2 event reporting
			in LTE or 1F/1I event
loggingInterval	CM	TraceJob.loggingInterval	reporting in UMTS. It specifies the
109gIIIgIIIcervar	Civi	litaceoob. logginginterval	periodicity of Logged
			MDT or Logged
			MBSFN MDT.
loggingDuration	CM	TraceJob.loggingDuration	It specifies the duration of the
			Logged MDT or
			Logged MBSFN MDT
			at the UE.
anonymizationOfMDTData	CM	TraceJob.anonymizationOfMDTData	It specifies the
			anonymization level of an area based
			MDT.
measurementPeriodLTE	CM	TraceJob.measurementPeriodLTE	It specifies the
			measurement period
			for the Data Volume and Scheduled IP
			Throughput
			measurements in the
			eNB within an
measurementPeriodUMTS	CM	TraceJob. measurementPeriodUMTS	Immediate MDT job. It specifies the
incubal cinciler of 10doll15	Oivi	indeed of incaparement of roading	measurement period
			for the Data Volume
			and Throughput
			measurements in the RNC within an
			Immediate MDT job.
collectionPeriodRrmUmts	CM	TraceJob.collectionPeriodRrmUmts	It specifies the
			collection period for M3, M4, M5 in UMTS
			within an Immediate
			MDT job.
collectionPeriodRrmLte	CM	TraceJob.collectionPeriodRrmLte	It specifies the
			collection period for M2, M3 in LTE within
			an Immediate MDT
			job.
positioningMethod	CO	TraceJob.positioningMethod	It specifies the
			positioning method to be used for the
			Immediate MDT job.
measurementQuantity	CM	TraceJob.measurementQuantity	It specifies which
			measurement should
			be collected in an event triggered
			measurement
			collection.
pLMNTarget	CM	TraceJob.pLMNTarget	It specifies which
			PLMN that the subscriber of the
			session to be
			recorded uses as
			selected PLMN.

Parameter Name	Qualifier	Information type	Comment
mBSFNAreaList	СМ		It specifies MBSFN Area(s) for MBSFN MDT measurement logging.

6.3.1.3 Output parameters

Parameter Name	Qualifier	Matching Information	Comment
status	М	ENUM (Success, Failure, PartialSuccess)	
unsupportedList	M	List of <managedentity, td="" tracedepth,<=""><td>It specifies what attributes</td></managedentity,>	It specifies what attributes
		ListOfInterfaces, TraceTarget, areaScope,	are not supported when a
		listOfMeasurements,reportingTrigger,	Trace Session is activated.
		reportInterval, reportAmount, eventThreshold,	The list can contain one or
		loggingInterval, loggingDuration,	all of the elements and
		anonymizationOfMDTData, measurementPeriodLTE,	relevant only for error
		measurementPeriodUMTS, positioningMethod,	cases.
		measurementQuantity reason, pLMNTarget)	

6.3.1.4 Pre-condition

 $\verb|validTraceReference|| AND | \verb|validTraceDepth|| AND | \verb|validTraceTarget||$

Assertion Name	Definition
validTraceDepth	The traceDepth input parameter is valid.
	The traceReference given is not matching to any existing traceReference value in the activated TraceJobs.
validTraceTarget	The traceTarget input parameter is valid.

6.3.1.5 Post-condition

traceSessionActivated

Assertion Name	Definition
traceSessionActivated	The Trace Session identified by the traceReference is activated in the given
	ManagedEntity instances.

6.3.1.6 Exceptions

Exception Name	Definition
invalidTraceDepth	Condition: (validTraceDepth) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.
invalidTraceTarget	Condition: (validTraceTarget) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.
notuniqueTraceReference	Condition: (validTraceReference) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.
pLMNTargetNotSupported	Condition: (validPLMNTarget) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.

6.3.1.7 Constraints

Name	Definition
listOfNeTypes	It is a Signalling Based Activated trace that is requested.
traceCollectionEntityAddress CM, CO qualifier	Mandatory when tracing in EPS is supported; Mandatory when MDT is supported; Optional when tracing in UMTS is supported.
areaScope	MDT is supported or RLF or RCEF reporting is supported
listOfMeasurements	MDT is supported
reportingTrigger	MDT is supported
reportInterval	MDT is supported
reportAmount	MDT is supported
eventThreshold	MDT is supported
loggingInterval	MDT is supported
loggingDuration	MDT is supported
listOfMeasurements	MDT is supported
traceDepth	Trace is supported
triggeringEvent	Trace is supported
anonymizationOfMDTData	MDT is supported
measurementPeriodLTE	MDT is supported
measurementPeriodUMTS	MDT is supported
collectionPeriodRrmUmts	MDT is supported
collectionPeriodRrmLte	MDT is supported
positioningMethod	MDT is supported

pLMNTarget	Several PLMNs are supported in the RAN and a Management Based Activation Trace Session is requested.
mBSFNAreaList	Logged MBSFN MDT is supported

6.3.2 Operation deactivateTraceJob (M)

6.3.2.1 Definition

This operation supports IPRManager's request to stop a TraceJob through Itf-N. When this operation is received in the TraceJob shall deactivate the requested Trace Session in the requested ManagedEntity instances.

6.3.2.2 Input parameters

Parameter Name	Qualifier	Information type	Comment
traceReference	M	TraceJob.traceReference	This is a unique ID of the TraceJob
traceTarget	М	_	(IMSI or IMEI or IMEISV or Public ID or Private ID or a Cell(identified by its DN id) or an eNB or a RNC. IMSI, IMEI, IMEISV,Public ID, Cell, eNB and RNC are mutually exclusive.

6.3.2.3 Output parameters

Parameter Name	Qualifier	Matching	Comment
		Information	
status	M	ENUM (Success,	The operation may fail because of a specified
		Failure)	or an unspecified reason.
traceRecordingSessionReference	CM		This would indicate if a Trace Recording
			Session is ongoing when the deactivation
			command has been given.

6.3.2.4 Pre-condition

validTraceReference

Assertion Name	Definition
	The TraceReference input parameter is valid, which means that the TraceIRP is aware of such TraceJob, which has this traceReference value and is aware of the ManagedEntity holding such Trace Session.

6.3.2.4 Post-condition

TraceSessionisdeactivated

Assertion Name	Definition
	The Trace Session identified by the traceReference is deactivated in the
	requested ManagedEntity instance and the TraceJob is stopped.

6.3.2.6 Exceptions

Exception Name	Definition
notuniqueTraceReference	Condition: (validTraceReference) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.

6.3.3 Operation listTraceJob (M)

6.3.3.1 Definition

This operation support IPRManager's request to list the parameters of a specific TraceJob through Itf-N.

6.3.3.2 Input parameters

Parameter Name	Qualifier	Information type	Comment
traceReference	М	TraceJob.traceReference	It specifies the Trace Session that is requested for
			interrogation.

6.3.3.3 Output parameters

6.3.3.4 Pre-condition

validTraceReference

Assertion Name	Definition
validTraceReference	The traceReference input parameter is valid, which means that the TraceIRP is aware of
	such TraceJob, which has this traceReference value and is aware of the
	ManagedEntity holding such Trace Session.

6.3.3.5 Post-condition

TraceSessionFound

Assertion Name	Definition
TraceSessionFound	The TraceIRP has found the requested TraceJob with the traceReference and can read
	the configured parameters.

6.3.3.6 Exceptions

Exception Name	Definition
notuniqueTraceReference	Condition: (validTraceReference) is false.
	Returned Information: output parameter status is set to "Failure".
	Exit state: Entry State.

6.3.3.7 Constraints

Name	Definition
traceCollectionEntityAddress CM,CO	Mandatory when tracing in EPS is supported;
qualifier	Mandatory when MDT is supported;
	Optional when tracing in UMTS is supported.
anonymizationOfMDTData	MDT is supported
areaScope	MDT is supported or RLF reporting is supported
listOfMeasurements	MDT is supported
reportingTrigger	MDT is supported
reportInterval	MDT is supported
reportAmount	MDT is supported
eventThreshold	MDT is supported
loggingInterval	MDT is supported
loggingDuration	MDT is supported
traceDepth	Trace is supported
triggeringEvent	Trace is supported
measurementPeriodLTE	MDT is supported
measurementPeriodUMTS	MDT is supported
collectionPeriodRrmUmts	MDT is supported

collectionPeriodRrmLte	MDT is supported
positioningMethod	MDT is supported
measurementQuantity	MDT is supported
pLMNTarget	Several PLMNs are supported in the RAN and a Managment Based Activation Trace Session is activated.
mBSFNAreaList	Logged MBSFN MDT is supported

6.3.4 Operation listActivatedTraceJobs (M)

6.3.4.1 Definition

This operation support IRPManager's request to list all the activated TraceJobs through Itf-N.

6.3.4.2 Input parameters

No input parameters for this operation.

6.3.4.3 Output parameters

Parameter Name	Qualifier	Matching Information	Comment
traceReferenceList			The TraceReferenceList provides the identification of
		TraceJob.traceRefe	each activated Trace Session.
		rence.objectinstan	If no TraceReference can be found, then this list is empty
		ce >	and status is "Success"
status	М	ENUM (Success,	The operation may fail because of a specified or an
		Failure)	unspecified reason.

6.3.5 Notification notifyTraceRecordingSessionFailure (O)

6.3.5.1 Definition

The TraceIRP notifies all subscribed IRPManagers and the Trace Collection Entity (if its address is provided) if a Trace Recording Session in a ManagedEntity has not been started due to any problem.

6.3.5.2 Input parameters

Parameter Name	Qualifiers	Matching Information	Comment
objectClass	M,Y	TraceIRP.objectClass	Notification header
objectInstance	M,Y	TraceIRP.objectInstance	Notification header
eventTime	M,Y		Notification header
notificationType	M,Y	"notifyTraceRecordingSessionFailure"	Notification header
systemDN	M,Y		Notification header
notificationID	O,Y		Notification header
traceRecordingSessionReference	O,N		The Trace Recording Session Reference may be visible only in signalling based activation.
traceReference	M,Y	TraceJob.traceReference	
reason	O,N		

6.3.5.3 Triggering event

6.3.5.3.1 From state

internalProblemInManagedEntity

Assertion Name	Definition
internalProblemInMa	Because of an internal problem the ManagedEntity cannot start a Trace Recording
nagedEntity	Session.

6.3.5.3.2 To state

newNotificationReported

Assertion Name	Definition
newNotificationRepo	The " notifyTraceRecordingSessionFailure " notification is emitted to the subscribed
rted	IRPManager(s).

6.3.6 Notification notifyTraceSessionLocalActivation (M)

6.3.6.1 Definition

The TraceIRP notifies all subscribed IRPManagers if a Trace Session is configured by the Element Manager.

6.3.6.2 Input parameters

Parameter Name	Qualifiers	Matching Information	Comment
objectClass	M,Y	TraceIRP.objectClass	Notification
			header
objectInstance	M,Y	TraceIRP.objectInstance	Notification
			header
eventTime	M,Y		Notification
			header
notificationType	M,Y	"notifyTraceSessionLocalActivation"	Notification
			header
systemDN	M,Y		Notification
			header
notificationID	O,Y		Notification
			header
traceReference	M,Y	TraceJob.traceReference	
traceTarget	M,Y	TraceJob.traceTarget	
iOCInstance	M,Y	ManagedEntity.objectInstance	

6.3.6.3 Triggering event

6.3.6.3.1 From state

unknownTraceReference

Assertion Name	Definition
unknownTraceReference	The TraceIRP has detected a traceReference associated to a Trace Session in a
	ManagedEntity that is not initiated via the ltf-N.

6.3.6.3.2 To state

newNotificationReported

Assertion Name	Definition
newNotificationReported	The " notifyTraceSessionLocalActivation " notification is emitted to the
	subscribed IRPManager(s).

6.3.7 Notification notifyTraceSessionIdentities (CM)

6.3.7.1 Definition

The TraceIRP or the MmeFunction notifies the Trace Collection Entity about the identities of the subscriber and Equipment in case of tracing a session in E-UTRAN only.

6.3.7.2 Input parameters

Parameter Name	Qualifiers	Matching Information	Comment
objectClass	M,Y	TraceIRP.objectClass, or	Notification
		MmeFunction.objectClass	header
objectInstance	M,Y	TraceIRP.objectInstance, or	Notification
		MmeFunction.objectClass	header
eventTime	M,Y		Notification
			header
notificationType	M,Y	"notifyTraceSessionIds"	Notification
			header
systemDN	M,Y		Notification
			header
notificationID	O,Y		Notification
			header
traceReference	M,Y	TraceJob.traceReference	
traceRecordingSessionReference	M,Y	TraceJob.traceRecordingSessionReference	
traceTarget	M,Y	TraceJob.traceTarget	

6.3.7.3 Triggering event

6.3.7.3.1 From state

FFS

Assertion Name	Definition
FFS	FFS

6.3.7.3.2 To state

FFS

Assertion Name	Definition
FFS	FFS

6.3.7.4 Constraint

Name	Definition
notifyTraceSessionIdentities Notification CM qualifier	Tracing is performed only in E-UTRAN
